## 2 Introduction

OwnCloud is a CloudHook plugin which offers the possibility to bind the Cloud Service OwnCloud to ILIAS. It allows users to manage the files and folder located in the Cloud directly within ILIAS.

### 2.1 Supported ILIAS-Versions

The plugin supports all ILIAS-Versions from 4.4.x to 5.1.x.

## 3 Feature Overview

| PL-Version | Changes |
|------------|---------|
|------------|---------|

|       |   |
|-------|---|
| 1.0.0 | <b>Key-Features:</b> <ul style="list-style-type: none"><li>• Creating a Cloud Object of type <i>OwnCloud</i></li><li>• Perform Base-Commands inside the OwnCloud folder (upload, download, create, delete)</li><li>• Change root folder</li><li>• Choose root folder at creation</li></ul> <p>Support for ILIAS 5.1</p> |
|-------|---|

## 4 Installation

To install this plugin, change to your ILIAS-Root-Directory and execute the following commands:

```
mkdir -p Customizing/global/plugins/Modules/Cloud/CloudHook/  
cd Customizing/global/plugins/Modules/Cloud/CloudHook/  
git clone https://github.com/studer-raimann/OwnCloud.git
```

As ILIAS administrator go to "Administration->Plugins" and install/activate the plugin.

### 4.1 OwnCloud - Configuration

### 4.2 ILIAS – Configuration

## 5 Usage of the Plugin

### 5.1 Create Object

## 5.2 Browse OwnCloud

## 5.3 Settings
